# The Perrott Family

With years of experience in the construction, quarrying, crushing, recycling and related industries, the Perrott family has built a group of related companies to provide a range of solutions to the construction, transport, waste management and recycling industries.

## In The Community

Based in the ever expanding Yatala area of Queensland, Recycling Developments are proud members of our local community. Directly employing up to 30 staff in the local area and indirectly employing many local contractors and services, keeping the benefit of our business within our community. We believe in creating a more sustainable future and thank our customers and local community for supporting us in our years of business.

## Environmental Sustainability

Recycling Developments is committed to creating a more sustainable and environmentally friendly future for our community, city, state and nation. We pride ourselves on making a difference for our local environment and being part of the solution for landfill diversion in the South East Queensland region. We are assisting the Gold Coast City Council with improving recycling and landfill diversion rates. We currently divert over 90% of all material received at our facility from landfill. Thank you for joining us in the movement for sustainability.

## Our Team

Recycling Developments are extremely proud of the people that make our facility and business what it is today. We extend a big thank you to the exceptional team that operate and take pride in being part of our team and making a difference.

## DELIVERING INDUSTRY SOLUTIONS

We provide a range of recycling and disposal solutions to all industries. We are committed to delivering excellence for our clients and our industry partners. Specialising in recycling solutions, we offer the experience and knowledge to deliver industry leading services and professional facility services to our customers.
